**AS APPROVED AND ADOPTED BY THE
COOLIDGE CITY COUNCIL
ON JANUARY 12, 2009
AND
EFFECTIVE ON FEBRUARY 12, 2009**

Building Permit Fee Schedule

City of Coolidge Development Services

This schedule lists fees for building permits, plan reviews, and other permits and fees charged by the City of Coolidge Development Services Department. Pursuant to ARS 11-863 these fees are approved by the Coolidge City Council. Fee tables are taken from the May 2003 Issue of Building Safety Journal published by the International Code Council and are modified or adjusted to reflect current building costs in Coolidge. All references to codes made in this schedule shall be those adopted in the Pinal County Building Code Ordinance.

I. GENERAL

In calculating the building fees for a building, the type of building is classified by the Building Official and the cost per square foot is based upon the valuation data in Article 2 or 9. The square footage of the building is multiplied by this data and the valuation is therefore set. Fees are then calculated by using the table in Article 3. Article 1 is then checked to see if any exemptions are applicable.

Fee tables for mechanical, plumbing and electrical (MP&E) permits are found in Articles 4, 5 and 6. Elevator and grading permit fee tables are found in Articles 7 and 8 respectively.

II. WHEN FEES ARE PAID

When plan review is required, a plan review fee, which is sixty-five (65%) percent of the building permit fee, must be paid at the time of application submittal. Building permit fees must be paid prior to issuance of a building permit. Re-inspection fees, when assessed, must be paid prior to any further inspections on that project.

III. OTHER FEES

Especially in new construction, other fees may be required. You will be instructed by counter personnel if zoning, health or any other fees are required in order for a permit to be issued.

Article 1 REFUNDS AND REDUCTIONS

Section 101 Fee Refunds

The Building Official may authorize refunding of a fee paid hereunder which was erroneously paid or collected.

The Building Official may authorize refunding of not more than eighty (80%) percent of the permit fee paid when no work has been done under a permit issued in accordance with this article.

The Building Official may authorize the refunding of not more than eighty (80%) percent of the plan review fee paid when an application for a permit for which a plan review fee was paid is withdrawn or canceled before any examination time has been expended.

The Building Official shall not authorize the refunding of any fee paid except upon written application filed by the original permittee not later than one-hundred-eighty (180) days after the date of fee payment.

Section 102 Fee Calculations

To determine building permit fees, the calculation shall be based upon eighty (80%) percent of the fee calculated in Table II. Sixty-five (65%) percent shall be assessed from the adjusted fee for plan review. All plans submitted for Master Plan will be charged sixty-five (65%) percent for the first review and all permits using the same Master Plan will be charged twenty (20%) percent of the permit fee for administrative fees.

Article 2 BUILDING VALUATION DATA

Section 201

The determination of value or valuation to be used in computing building permit and plan review fees shall be based upon industry recognized sources, and **Table II** of this schedule. **Table II** is taken from the May 2003 Issue of Building Safety Journal published by the International Code Council. This table has been adjusted by regional modifiers to reflect the cost of construction in Pinal County.

Building valuation data shall be reviewed annually, prior to each new fiscal year, and shall be revised as necessary in accordance with current economic values.

TABLE I - SQUARE FOOT CONSTRUCTION COSTS

a.	Private garages use utility, miscellaneous
b.	Unfinished basements (all use group) = \$15.00 per sq. ft.
c.	N.P. = Not permitted

The International Code Council is pleased to provide the following Building Valuation Data (BVD) for its members. As indicated the May 2003 issue of the Building Safety Journal, ICC will now publish one data sheet in an effort to move toward complete consolidation and provide the most efficient set of formation for jurisdictions to use.
