MONTHLY ACTIVITY REPORT

MARCH
2026

PREPARED BY: SENIOR CRIME ANALYST SANDRA MARTINEZ

Footnotes

The statistics contained in this report were gathered from Coolidge PD CAD and RMS. The crime rate is calculated using this estimated population per 1,000 persons. The 2026 population estimate is 22,720, provided by a TischlerBise Report.

CHANGE FROM UCR TO NIBRS REPORTING BEGINNING 2019

In previous years, eight crimes total (VIOLENT CLASS: Homicide, Rape, Robbery, Aggravated Assault & PROPERTY CLASS: Burglary, Theft, Motor Vehicle Theft, Arson) were reported for statistical purposes to the Department of Public Safety and the FBI under the Uniform Crime Reporting standards.

Comparative data between the two may appear skewed because of the differences of the two reporting methods. By convention, the crime rate was measured from the calculation of the Uniform Crime Report (UCR) Part I crimes (listed above). While more than one crime may occur in some circumstances, only the highest index crime was scored (or counted).

By the beginning of the year 2021 it will be mandatory for all agencies to report crime data through NIBRS (National Incident Based Reporting System). This reporting method differs from UCR as it collects and measures details on each single crime incident—as well as on separate offenses within the same incident—including information on victims, known offenders, relationships between victims and offenders, arrestees, and property involved in crimes. The reporting is more detailed and comprehensive, rather than a tally of crime.

There is a possibility that perception of higher crime levels exist when NIBRS actually establishes a new baseline which better represents reported crime in a community. Because the two reportings systems are so different, little comparison will be done of UCR and NIBRS

NIBRS measures crime in two different categories: Group A and Group B which consist of crimes against persons, property and society.

By convention, the crime rate is measured from the calculation of the National Incident-Based Reporting System Group A crimes.

Please keep in mind that percent changes can be high when comparing small numbers.
